As a member of the Center for Science in the Public Interest (CSPI), I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics. And that can leave physicians with no way to treat life-threatening bacterial infections in humans. That's why I support the petition filed by CSPI.

The Center for Science in the Public Interest (CSPI) is the non-profit health-advocacy group that publishes Nutrition Action Healthletter. CSPI mounts educational programs and presses for changes in government and corporate policies.

Dear Ms. Henney,

Please read the article above. I  
enclose you to get rid of the antibiotics  
in animal feed for obvious reasons.  
If someone were to get an infection caused  
by one of these resistant bacteria, the anti-  
biotics that a doctor prescribes could  
kill that person!

Please give this your immediate attention.  
Thank you.

Sincerely,  
Alberta Burns
